I'm an Industrial Design graduate who enjoys working on smart products. I intend to work at the intersection of technology and design - helping combine and produce technologically superior products with design thinking and user experience at their core.

I have an interest in new products that involve research from the ground up, to the final product where prototyping and testing are involved - particularly electronic products and interfaces.

Experience

Industrial Design Intern
Instillmotion Consulting, Hyderabad
February - June 2022
Prototyping and internal design of smart products involving mockups, proof of concepts and 3D printed prototypes.

Design/ Development Intern
Yaksha Visual Technologies, Chennai
January - June 2017
Worked in a team developing AR educational apps - card design, UI design and also developed a backend API for the application's data management and authentication.

UI/UX Design Intern
Justbootup Technologies, Coimbatore
June - December 2016
Designed websites for multiple clients, prototyped websites and interactions.

Education

B.Des, Industrial Design
National Institute of Design, Haryana
2017-2021

BA, Psychology
IGNOU
2016-2022

I can speak Malayalam, English and Hindi and I'm from Kannur, Kerala

Skills
Prototyping
User Research
Product Design
Interaction Design
UI Design
UI Prototyping
AR Prototyping

Interests
Tinkering
3D Printing
Carpentry
Reading
Photography

Softwares
Autodesk Fusion 360
Rhinoceros 3D
Keyshot
Adobe Illustrator
Figma

Languages
Node.JS
JavaScript
HTML
Arduino (C++)
React
C#

Prototyping
Hands-on
3D Printing
Raspberry Pi
Arduino
Unity
